SENIOR ANDROID ENGINEER | KOTLIN | JAVA | JETPACK COMPOSE | COROUTINES & FLOW | ARCHITECT

Senior Android Engineer with 10+ years of experience building and modernizing production-grade mobile applications across enterprise and product-driven environments. Strong technical expertise in Kotlin, Java, Coroutines, Flow, Jetpack Compose, and modern Android architecture, with additional hands-on experience in Flutter and Dart. Experienced in technical leadership, architectural decision-making, application modernization, offline-first engineering, testing, and CI/CD. Skilled in AI-assisted software development and Spec-Driven Development, with a hands-on approach to building scalable, maintainable, and reliable mobile applications.

TECHNICAL SKILLS

Android Development: Kotlin, Java**,** Android SDK, Android Jetpack, Compose, XML Layouts, ConstraintLayout, ViewModel, Navigation Component, WorkManager, Scoped Storage, ProGuard / R8
Concurrency & Reactive Programming: Kotlin Coroutines, Structured Concurrency, Flow, StateFlow, Lifecycle-Aware Data Collection, Unidirectional Data Flow (UDF)
Architecture & Design: Clean Architecture, MVVM, MVI, SOLID Principles, Repository Pattern, Modularization, Dependency Injection, Hilt/Dagger, Design Patterns
Networking & Persistence: Retrofit, OkHttp, REST APIs, OAuth 2.0, Room, SQLite, Offline-First Architecture, SharedPreferences, Secure Storage, Firebase Cloud Messaging (FCM)
Testing & Engineering Quality: JUnit, Mockito, Coroutine Testing, Flow Testing, Unit Testing, UI Testing, Integration Testing, SonarQube, Firebase Crashlytics, Automated Quality Gates
CI/CD, Security & Delivery: Gradle, GitHub Actions, Jenkins, Fastlane, Checkmarx, Black Duck, Google Play Console, App Release Management
Cross-Platform & AI-Assisted Development: Flutter, Dart, Riverpod, Platform Channels, GitHub Copilot, OpenSpec, Spec-Driven Development, AI- Assisted Code Generation, Refactoring and Testing

PROFESSIONAL EXPERIENCE

WOLTERS KLUWER, Vadodara, India **October 2022 - October 2026**
Sr. Product Software Engineer (Technical Lead - Mobile)
Permanent since May 2024 | Previously via Rishabh Software

- Orchestrated native Android engineering using Kotlin, Clean Architecture, MVVM, Hilt, and Room, while modernizing legacy XML-based interfaces with Jetpack Compose.
- Implemented reactive application workflows using Kotlin Coroutines, Flow, and StateFlow, integrating ViewModel and Room with lifecycle-aware data collection.
- Spearheaded the technical execution of the migration from native Android and iOS applications to a unified Flutter architecture, migrating approximately 95% of shared business logic.
- Sustained native Android production support throughout the migration, resolving critical production defects and hotfixes and remediating security findings identified through Black Duck and Checkmarx.
- Engineered an offline-first synchronization engine for receipts and drafts using Drift and SQLite, defining persistence and retry strategies for unreliable network conditions.
- Attained 80%+ test coverage across both native Android and Flutter projects through automated testing practices.
- Improved sprint-to-PR delivery efficiency by approximately 40% by introducing AI-assisted Spec-Driven Development workflows using GitHub Copilot and OpenSpec.

ASM ENTERPRISE SOLUTIONS (CLIENT: RELIANCE JIO), Mumbai, India **July 2021 - October 2022**
Android Application Developer

- Modernized core JioPOS Plus modules, including Digital KYC, by migrating legacy Java components to Kotlin and implementing MVVM architecture with Room and Kotlin Coroutines.
- Implemented Android 11 and 12 compatibility updates, addressing scoped storage requirements, background execution restrictions, and device-specific compatibility issues.
- Identified and resolved production ANRs and application stability issues in collaboration with QA and backend teams, ensuring reliable transaction workflows.
- Implemented production enhancements and bug fixes for business-critical transaction workflows, maintaining application stability across releases.

MOBIIWORLD, Surat, India **October 2019 - July 2021**
Mobile Application Developer

- Developed features for a live football scoring application, integrating Firebase Realtime Database to deliver real-time match and score updates.
- Migrated core application features from MVC toward MVI architecture, improving state management, reducing UI inconsistencies, and supporting predictable rendering.
- Optimized Android UI performance through memory profiling, image caching improvements, and efficient RecyclerView view-holder management.
- Participated in code reviews and followed team coding and Git practices to maintain code quality and support reliable releases.

DIFFERENZ SYSTEM, Surat, India **June 2016 - August 2019**
Sr. Mobile Application Developer

- Led a team of 4-5 mobile developers across client projects, coordinating technical implementation, sprint planning, code quality, and production releases.
- Built native Android applications across multiple client projects, delivering features aligned with business requirements and user expectations.
- Mentored junior developers through code reviews, debugging, and architectural guidance, promoting maintainable code and consistent development practices.
- Designed and implemented offline-first caching and local persistence using SQLite and Room, supporting reliable field-service workflows in low-connectivity environments.

EDUCATION

Master of Computer Applications
Uka Tarsadia University, Bardoli, India

Bachelor of Computer Applications
Veer Narmad South Gujarat University, Surat, India
