SENIOR FLUTTER ENGINEER | ANDROID & FLUTTER

Senior Mobile Engineer with 10+ years of experience building and evolving production-grade mobile applications across Flutter and native Android. Strong technical background in Flutter, Dart, Kotlin, mobile architecture, Clean Architecture, MVVM, API integration, offline-first synchronization, testing, and CI/CD. Experienced in technical leadership, architectural decision-making, cross-platform modernization, engineering quality, and AI-assisted software development**.**

KEY SKILLS

Flutter & Cross-Platform : Flutter SDK, Dart, Riverpod, BLoC/Cubit, Provider, GoRouter, Platform Channels, Isolates, Deep Linking
Native Android Foundations : Android SDK, Kotlin, Java, Jetpack Compose, Coroutines, Flow, WorkManager, Foreground Services, Memory Profiling, Gradle
Architecture & Technical Leadership : Clean Architecture, MVVM, MVI, Modularization, Offline-First Architecture, Repository Pattern, Dependency Injection, SOLID Principles, Technical Design, Architecture Reviews
Networking & Persistence : RESTful APIs, Dio, Retrofit, OAuth 2.0, Drift, SQLite/Room, Secure Storage, SharedPreferences
Testing & Engineering Quality : Unit Testing, Widget Testing, Integration Testing, Mockito, SonarQube, Automated Quality Gates, Firebase Crashlytics
CI/CD, Security & Delivery : GitHub Actions, Checkmarx, Black Duck, Google Play Console & Apple App Store Releases, Agile/Scrum
AI-Assisted Development : Spec-Driven Development (SDD), GitHub Copilot, ChatGPT, Claude, Code Generation, Refactoring, Debugging, Code Analysis, Test Generation, Documentation

PROFESSIONAL EXPERIENCE

WOLTERS KLUWER, Vadodara, India **October 2022 - October 2026**
Sr. Product Software Engineer (Technical Lead – Mobile)
(Permanent since May 2024 | Previously via Rishabh Software)

- Led the migration of enterprise Android and iOS applications to a unified Flutter architecture, consolidating 95%+ of shared business logic while maintaining legacy application support during rollout.
- Spearheaded architectural decision-making for Flutter feature modules, establishing Riverpod, GoRouter, and modular design standards to align implementation approaches and improve codebase maintainability.
- Managed the technical design of an offline-first synchronization engine for receipts and drafts, defining data persistence and retry strategies using Drift and SQLite to support reliable operation under intermittent connectivity.
- Established automated quality gates using SonarQube, with an 80%+ test coverage target and code duplication below 3% across new code.
- Established Spec-Driven Development using GitHub Copilot and OpenSpec, streamlining implementation workflows and reducing sprint-to-PR delivery time by approximately 40%.

- Coordinated with DevOps and cross-functional stakeholders to streamline mobile release workflows, aligning CI/CD automation and security scanning with Google Play and Apple App Store deployment requirements.

ASM ENTERPRISE SOLUTIONS (CLIENT: RELIANCE JIO), Mumbai, India **July 2021 - October 2022**
Android Application Developer

- Modernized core JioPOS Plus modules by migrating legacy Java code to Kotlin and implementing MVVM, improving separation of concerns and long-term maintainability.
- Spearheaded Android platform upgrades for Android 11 and 12, resolving compatibility challenges while preserving stability across existing functionality.
- Delivered production-ready features across multiple release cycles in collaboration with product, backend, and QA teams.
- Diagnosed and resolved production issues and platform-specific issues, contributing to a more stable and reliable application.

MOBIIWORLD, Surat, India **October 2019 - July 2021**
Mobile Application Developer

- Developed and evolved a live football score application delivering near real-time match updates with a responsive user experience.
- Migrated core application features from MVC toward MVI architecture, improving state management, reducing UI inconsistencies, and supporting predictable rendering.
- Integrated Firebase Realtime Database to provide reliable live score synchronization during ongoing matches.
- Worked with product and design teams to continuously improve application performance, usability, and feature delivery.
- Contributed to code reviews and technical discussions that improved code quality and encouraged consistent development practices.

DIFFERENZ SYSTEM, Surat, India **June 2016 - August 2019**
Sr. Mobile Application Developer

- Led a team of 4–5 mobile developers across client projects, coordinating technical implementation, sprint planning, code quality, and production releases.
- Built Android applications across multiple client projects, delivering features aligned with business requirements and user expectations.
- Mentored junior developers through code reviews, debugging, and architectural guidance, promoting maintainable code and consistent development practices.
- Designed and implemented offline-first caching and local persistence using SQLite and Room, supporting reliable field-service workflows in low-connectivity environments.

EDUCATION

Master of Computer Applications (MCA)
Uka Tarsadia University, Bardoli, India

Bachelor of Computer Applications (BCA)
Veer Narmad South Gujarat University, Surat, India
